PROFILE

Product designer with 10+ years of end-to-end web and app design, mostly B2B in payment-heavy or regulated domains (banking, insurance, SaaS billing). Today I own product design for a B2B all-in-one sales platform: I design its embedded AI assistant, rebuilt the design system as one token source shared by Figma, code and the AI, and prototype front-end inside the monorepo with Figma MCP and Claude Code. Comfortable embedded in a dev team with a light PM touch: I frame problems, write logic and acceptance criteria, defend decisions, and stay through design QA and release. Led teams for 4+ years and still prefer doing the work.

EXPERIENCE

Senior Product Designer & Design Lead
Jan 2025 – present · Remote

Bilhon — Clickmax · B2B SaaS

All-in-one platform for digital businesses (funnels, pages, CRM, automations, payments, members area). I own product design across the customer platform, admin dashboard and members area in Shape Up cycles, from framing to design QA, set priorities and the quality bar with product and engineering, and mentor a small design team while staying hands-on.

- **AI-powered product experience.** Designed the product's AI layer (the Max assistant): the closed manifest of generative UI widgets it may render in chat (metric, chart, comparison, ranking, recommendation and suggested-action cards), its response guidelines (incapacity, errors, partial data, plain language for non-experts), its extension into Payments, and an AI-credits add-on with usage dashboards.
- **Design system as one source of truth.** Rebuilt the design system (CX-DS) on DTCG tokens that generate both Figma variables and Tailwind CSS; human-built components and AI-emitted widgets share the same tokens, so changes propagate to both. Light/dark theming included.
- **AI-assisted workflow, embedded with engineering.** Prototype front-end in the ~80-package monorepo with Figma MCP and Claude Code inside the design system, open draft PRs that developers take over, and co-defined the team's process for AI-built deliveries (concept prototype → phased PRs → design QA). Framed the onboarding for connecting external AI agents (MCP) to the platform.
- **Payments & billing design.** Plan limits and paywalls, recurring Pix, smart installments, Stripe for international customers, KYC emails, purchase/refund terms, affiliate commissioning.

Senior Product Designer (Lead)
Nov 2024 – Feb 2025 · Remote

FullStack Labs — client: Procore (USA)

- Led 3 designers on a data-visualization and AI-insights product for resource management in a US construction platform; stakeholders called the delivery a turning point. Fully remote, in English, with an international team and client.

UX Manager (2022–24) · Lead Product Designer (2021–22)
Aug 2021 – Nov 2024 · Remote

MJV Technology & Innovation · design & innovation consultancy

- As Lead, ran UX/UI for SulAmérica (insurance and pensions), 10+ designers across 5 concurrent projects; contracts expanded and teams doubled within 6 months. As Manager, oversaw 50+ professionals across 13 clients while staying hands-on in discovery, user interviews and service design for Coca-Cola (strategy analytics platform), Bayer, Albert Einstein Hospital and banks (Bradesco, Santander).

UX/UI & Design System Designer
Oct 2018 – Aug 2021 · Brasília

Stefanini — client: Caixa Econômica Federal (bank)

- Conceived and shipped the CAIXA Design System, adopted nationwide by Brazil's largest social bank. Designed the B2B real-estate financing system and the national housing-program analysis system: regulated, high-volume financial flows.

Design Lead (freelance) · Product Marketing Manager
2020 – 2025 · Remote

8pixel — Shotlist (USA) · UX Unicórnio

- Shotlist (2024–25): full rebuild of a production-planning product for a Hollywood photographer/director, new design system and app, leading 2 designers with the tech lead. UX Unicórnio (2020–24): coordinated product design and sales pages for Brazil's largest UX course (US$5M+ revenue); as PMM aligned the multichannel experience with go-to-market and pricing.

CORE SKILLS

End-to-end product design · Design systems & tokens · B2B SaaS · UX research & usability testing · Information architecture · Interaction & UI design · Acceptance criteria & specs · Shape Up / continuous discovery · Payments & billing flows · Facilitation & workshops

AI IN PRACTICE

AI assistant & generative UI design · Figma MCP · design-to-code · Claude Code / agentic workflows · Prompt & response guidelines · MCP / agent onboarding

TOOLS

Figma (advanced) · Tokens Studio · Style Dictionary / DTCG · Tailwind & React (prototyping) · Linear

EDUCATION & TRAINING

MBA, UX Design & UX Research
UNIFATEC / UX Unicórnio · 2022–2025 · coursework

B.A. Graphic Design
Cruzeiro do Sul · 2018–2020 · coursework

Technical Graphic Design & WorldSkills training
SENAI · 2015–2016 · ~4,000 h intensive practice

Courses: Design System Specialist (Meiuca) · Accessibility (Access Boost) · UI Expert (Lucas Assis)

RECOGNITION

WorldSkills 2017 (Graphic Design): 5th nationally, Certificate of Excellence; coached the 2019 bronze medalist as a SENAI instructor. Eight case studies in EN/PT-BR on the portfolio site (CAIXA Design System, Clickmax, Albert Einstein Hospital, Coca-Cola, Shotlist).
